

Coli A10 with Stator 2200

1) Counter clockwise rotation

Figure shows the advance curve in counter clockwise rotation.

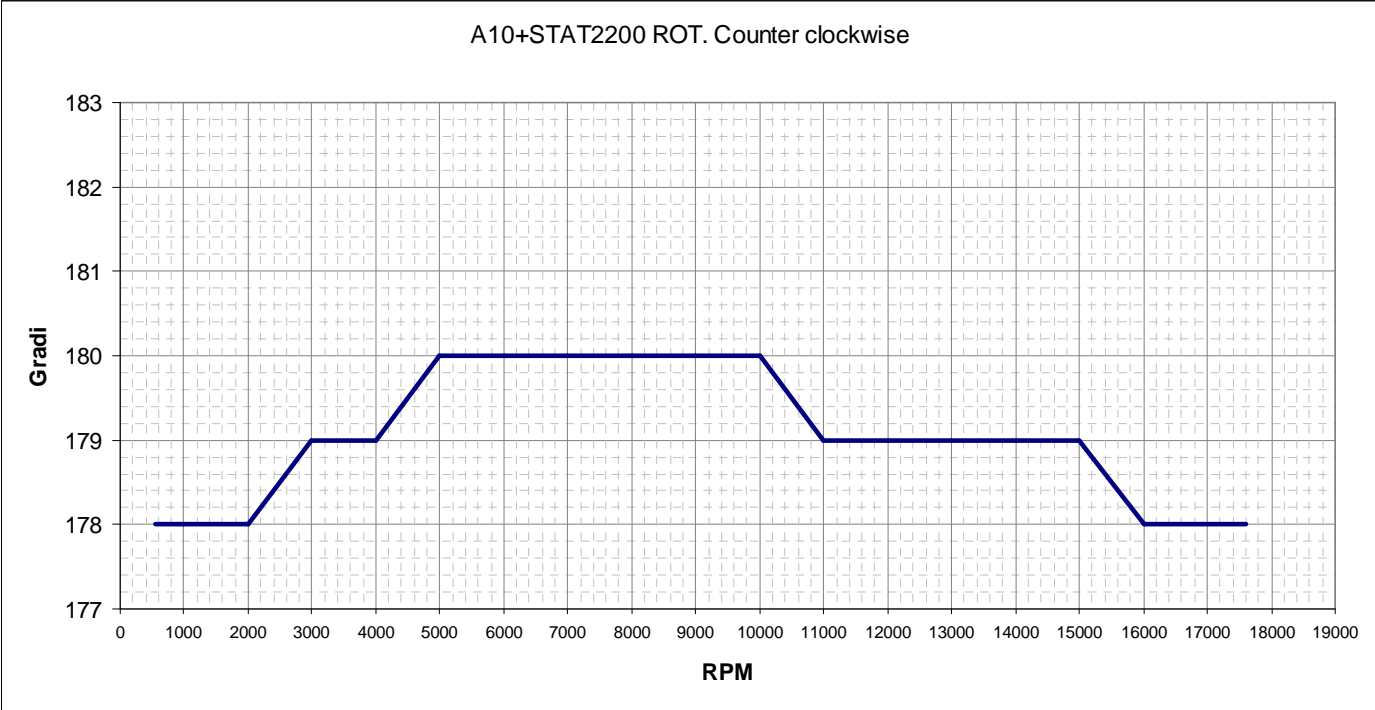

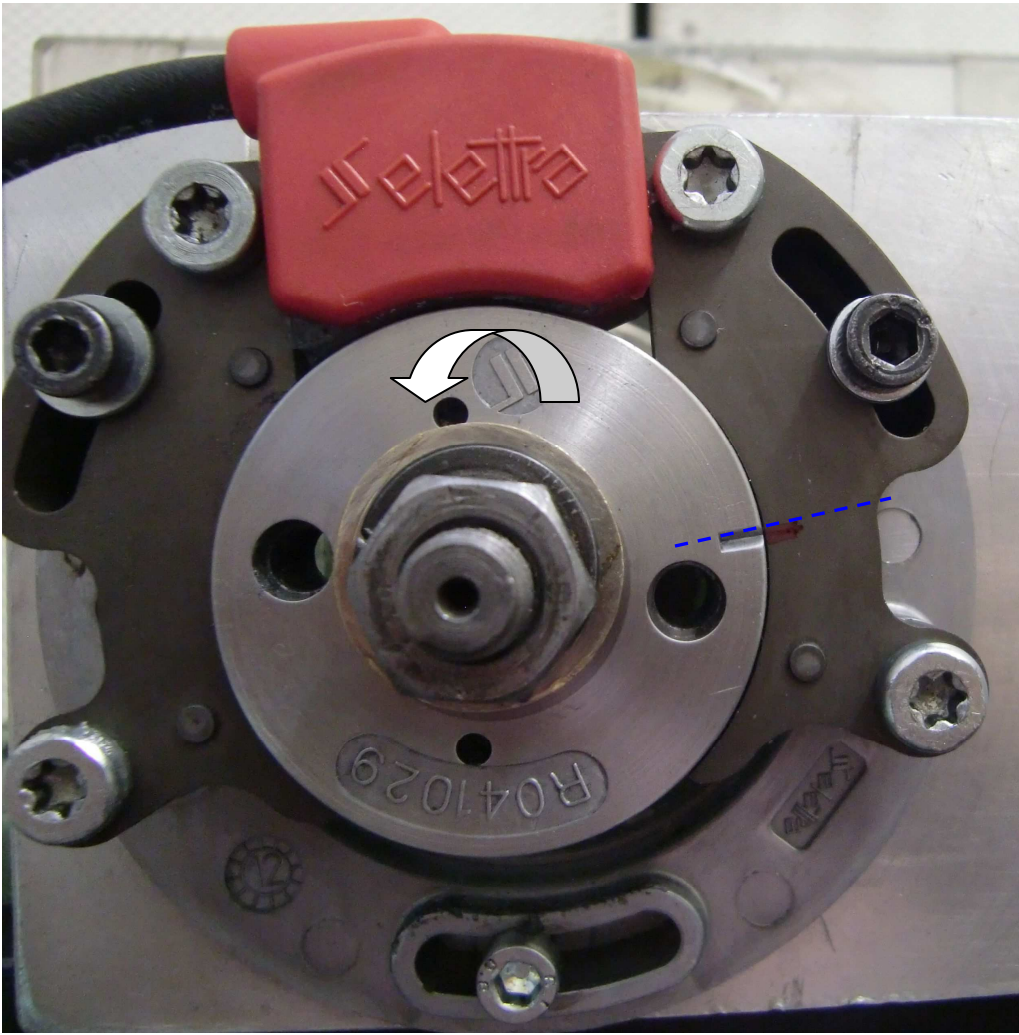

Figure shows the timing layout with speed of 5000rpm in counter clockwise rotation.

2) Clockwise rotation

Figure shows the advance curve in clockwise rotation.

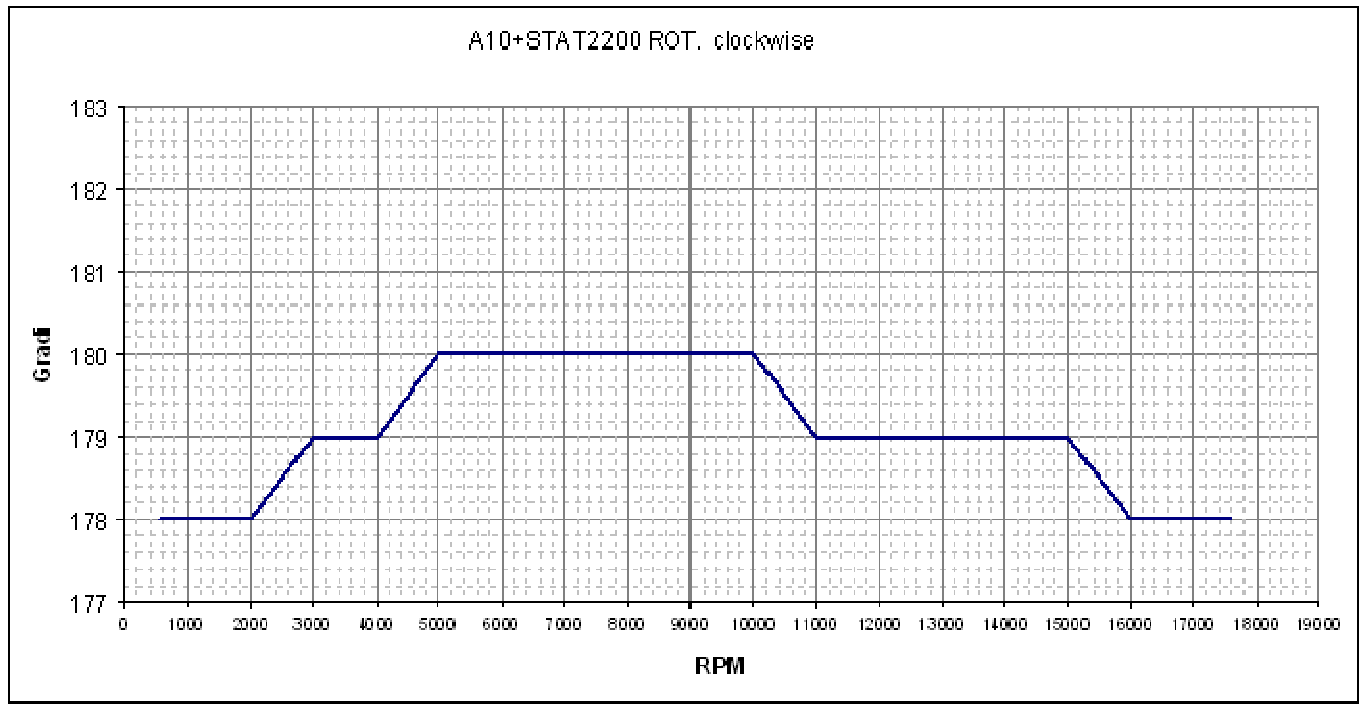

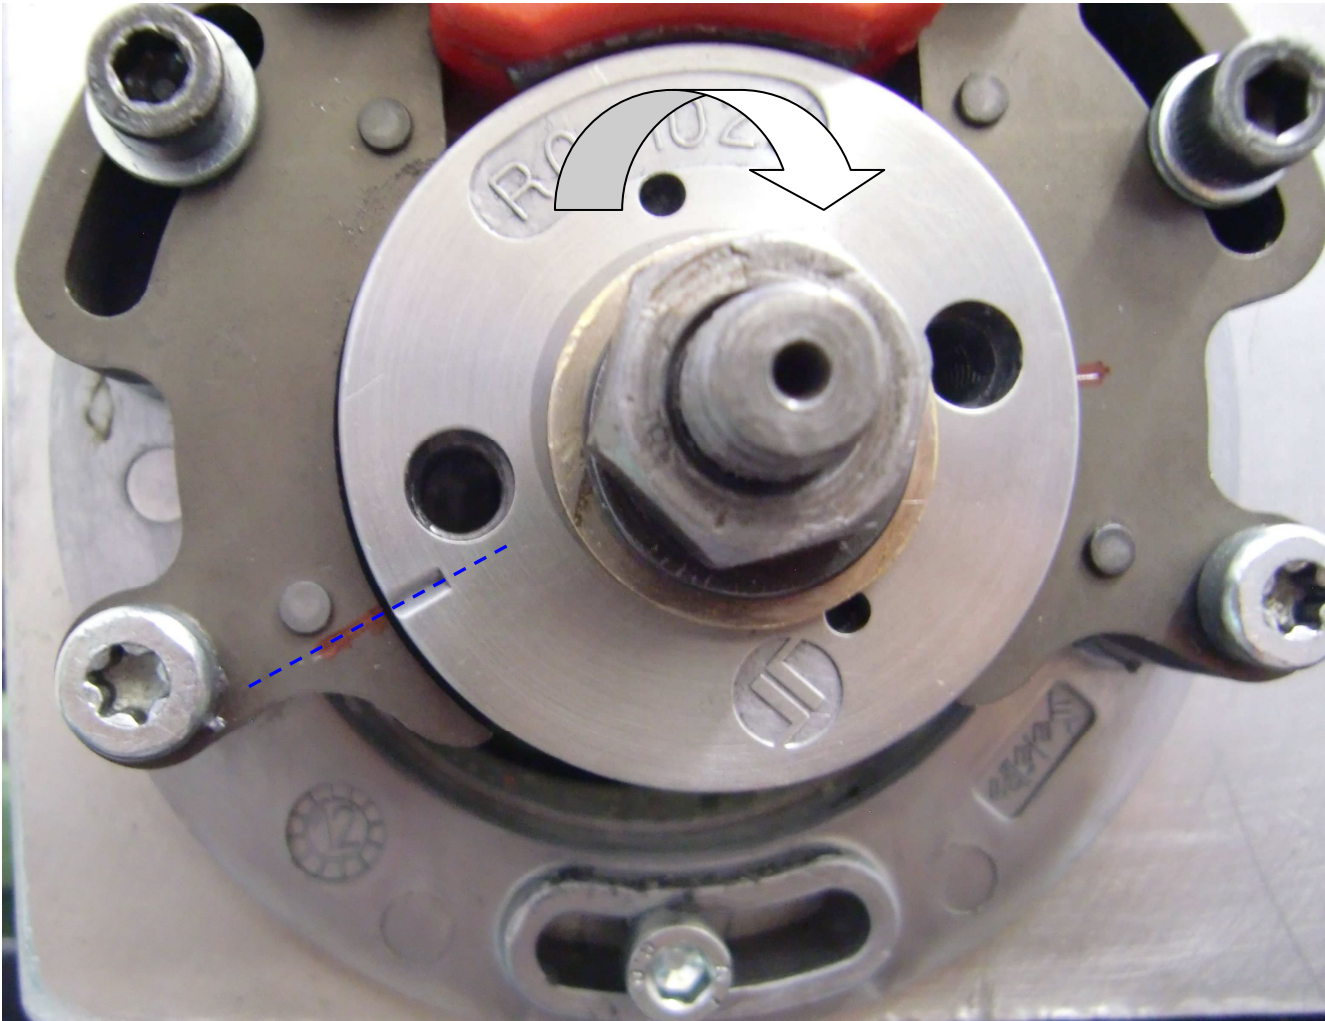

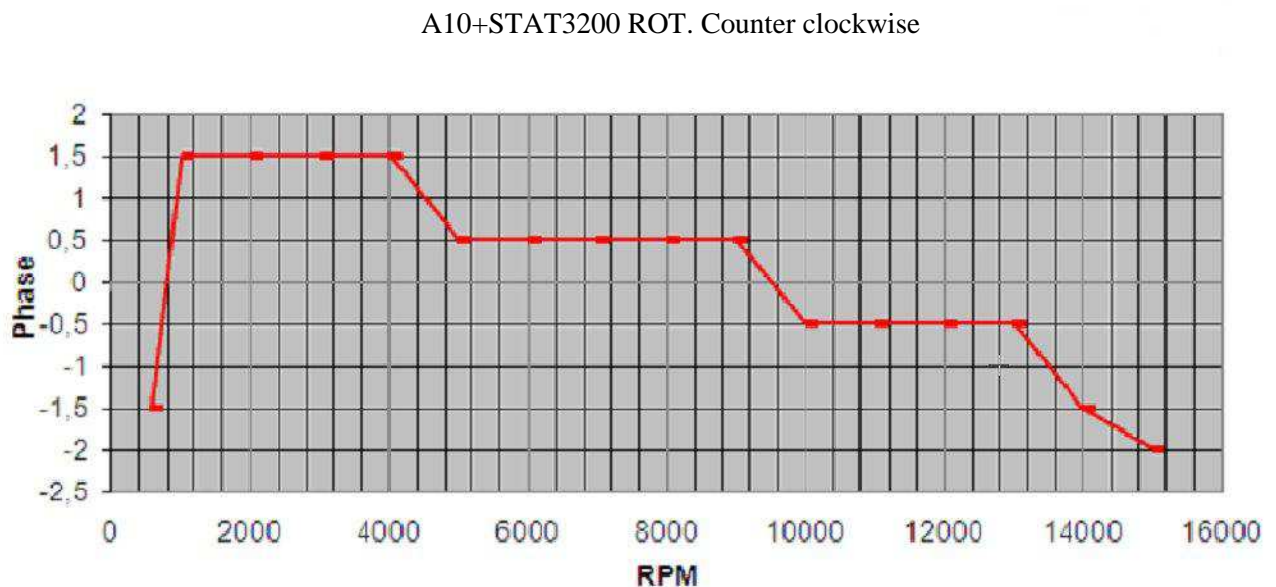

Figure shows the timing layout with speed of 5000rpm in clockwise rotation.

Coli A10 with Stator 3200

1) Counter clockwise rotation

Figure shows the advance curve in counter clockwise rotation.

The timing layout in counter clockwise rotation is the same of counter clockwise A10 with stator 2200 timing layout.

2) Clockwise rotation

The advance curve in clockwise rotation is the same of advance curve in counter clockwise rotation.

The timing layout in clockwise rotation is the same of clockwise A10 with stator 2200 timing layout.
